Forecast for Sunday 11 Sep 2022

Weather: Some early morning mist and fog patches soon lifting leaving the Brecon Beacons dry with sunny spells. Cloud tending to increase from the west from late morning with mostly overcast during the afternoon. Chance of a little light rain or drizzle here and these across western peaks late afternoon and early evening.

Chance of cloud-free hill tops above 600m: 95% reducing to 40% from late afternoon.

Low cloud and visibility: After the clearance of any early morning mist or fog patches, visibility will mostly be very good across the Brecon Beacons. During the afternoon cloud will increase but the cloud base will remain well above the summits until late afternoon or early evening, when bases will drop towards 500m. Visibilities also reducing a little, particularly with any light rain or drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Although it will feel pleasant in any sunshine in the valleys, it will be cool on the summits, so warm clothing is advised. Conditions are likely to deteriorate late afternoon and early evening, which could make descent from the summits more challenging.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 11 Sep 2022	0mm	6mm	16mm

Forecast for Monday 12 Sep 2022

Weather: Outbreaks of rain are possible through the early hours of the morning, clearing to leave a generally dry day with fairly extensive high cloud. Further outbreaks of light and patchy rain are likely during the afternoon, perhaps more persistent for a time early evening.

Maximum wind: Southerly 10-15 mph, gusting to 20-25 mph near summits at times.

Chance of cloud-free hill tops 600m: 80%.

Low cloud and visibility: Cloud mostly above the level of the summits throughout the day, however shreds of cloud occasional dropping towards 500-600 meters. Visibility generally good, but poor in any rain and drizzle.

Temperature: **Valleys:** Plus 15 Celsius, rising to Plus 21 Celsius.
At 600m: Plus 12 Celsius, rising to Plus 15 Celsius.
Freezing level: Above the summits.
